A beautiful monument, copied from that of Queen Philippa in Westminster Abbey, and made from this Alabaster, is now exhibiting at the Crystal Palace. A statue of the late Earl Ferrers, from the same material, is now in the hands of the sculptor, Mr. E. Gordon, Mulberry-terrace, London.

DANSOME and PARSONS beg to draw the attention of Architects, Builders, and others, to their PATENT STONE, which in its composition, differs essentially from all other artificial productions for a similar purpose.—Flint forms the basis. In character, texture, and appearance it is found to resemble every kind of natural stone, at pleasure, from the finest marble to the coarsest sandstone, and to possess all their durable and enduring properties, without being liable to any of their defects. It is especially applicable to all kinds of architectural work, such as mouldings, fountains, balustrades for terrace walks, vases and pedestals, &c., &c.; also, for all varieties of plain and ornamental Stonework. In price it is far below the cost of any natural product, and, in many cases, can be furnished as low as ordinary cement. MOORE'S PATENT LEVER VENTILATOR.

The principle of the LEVER VENTILATOR is simple and most effective, which will be seen by the accompanying Drawing, and its action is so arranged that no accident can occur to the Glass Louvres, nor is it in any way likely to get out of order. The whole of the Frame, Levers, and Screws, are made of Brass, thereby avoiding rust. It is suited to most forms of sashes, and is opened and closed with great facility, and can be regulated to any quantity of ventilation. Its action is produced by a line, which pulled, opens the Louvres, and, when loose, closes air-tight. It takes less space than any other Ventilator, and does not interfere with the appearance of the window. Much greater ventilation is obtained by the Louvres throwing out and, by which air passes upwards, and is equally distributed over the whole of the apartment. Orders for Ventilators should give the sight measure of the sash for which they are intended. A cheaper description of this Ventilator is made for Churches, Chapels, Bed-rooms, Work-shops, &c. JOHN MOORE and SONS, Church, Turret, and House Bell Manufacturers, 39, & 40, Clerkenwell-close, London; Clock Makers to the Honourable Board of Ordnance, the Navy, Government, and the Emperor of China. N.B.—A List of the Clocks made at the above Manufactory can be had either by post or otherwise.
